We Make the Magic Work  
802.453.3335

“From *small* beginnings }  
come *great* things.”

Start with a single room, then expand and elevate your home or luxury space. Whether wired or wireless, your Vantage system provides convenience, comfort, and security.

{ get started }

The dimmer is key to room ambiance, energy efficiency, and sustainable living.

Once you have experienced how precise wireless dimming enriches your life, you will never go back.

“The Vantage System has simplified our house.”

- John Elway -

{ limitless opportunities }

Effortlessly set lighting scene levels with a single button press.

Programmable scene control lets you fine-tune multiple lighting loads in a unified space, allowing you to relax and enjoy an intimate evening at home. At the end of the day, relax knowing the touch of a button can precisely set lighting, shading, and climate for the night.

DSUxxxxxxx

{ intelligent and secure }

The InFusion controller is the gatekeeper for system communication and control.

Unwind with peace of mind. Exterior lighting provides security with timed outdoor scenes. Sensors detect when no one is present and turn lights off. Shading adjusts based on time of day or privacy needs, all intelligently managed by the InFusion Controller.

{ flexible and convenient }

Use your own smartphones or tablets for mobile access and control.

Expand and modify your system at any time with in-home wireless communications, local control, and mobile control. With Vantage's proprietary software platform, a personalized InFusion system by Vantage is the most scalable system available today.

A *unique* approach to “no new wire” lighting integration – *conceived* by you, *designed* by Vantage, *delivered and supported* by a professional team, and backed by a limited, *5-year warranty*.
